

YOU-RISTA

Automatic rinse

You will need:

- 🕒 about 30 seconds
- 🔄 each time it is switched on, the YOU-RISTA rinses leftover water out of the system and the coffee spout

AUTOMATIC RINSE

Read the safety warnings carefully before using and only use the product as described in these instructions to avoid accidental injury or damage.

Why should I activate the automatic rinse function?

The automatic rinse function rinses coffee residue and leftover water in the machine out through the coffee spout. This is important for maintaining the original flavor of the coffee.

When does the automatic rinse take place?

Each time the machine is switched on, it will independently rinse out the brewing chamber and coffee spout. This takes about 30 seconds.

- Upon delivery, the automatic rinse function is already set to take place each time the machine is switched on.
- If you insert a Qbo capsule before the automatic rinse has started (not recommended), the rinsing cycle will be skipped. The machine will then switch to the drinks menu.
- If you switch the machine off and on again within a few minutes, the water in the coffee spout will still be fresh – the rinsing cycle will be skipped in this case.

Switching the automatic rinse on/off

- ▷ Press the settings menu button .

- ▷ Select the menu option **RINSING** (1.).
- ▷ Press the dial (2.) to select either **Turn on rinsing** or **Turn off rinsing**.
- ▷ If necessary, press the drinks menu button  to return to the drinks menu.

Tip: If you have switched off the automatic rinse function or if you would simply like to give the machine and coffee spout a quick rinse with water at any point during use, you can easily do so with the following trick:

- You may want to place a small container under the coffee spout to catch the rinse water and avoid splashes.
- ▷ Press the maintenance menu button .

- ▷ Select the menu option **Heat your cup** (1.).
- ▷ Press the dial (2.) to select **Start heating cup**.

- ▷ Turn the dial while the water is being dispensed from the coffee spout to rinse more or less water through the machine.
- ▷ Wait until "Heating of cup completed" is displayed. The machine will then automatically switch to the drinks menu.
